

**You wouldn't feed a raccoon.
So please don't feed the rabbits.**

Feral rabbits are not native to Kelowna. They are a result of people releasing their pets into the environment. These animals can harm the local environment and can also damage farms and landscaping.

By working together, we can ensure a peaceful co-existence between people and wildlife in Kelowna.

What Can I Do?

- don't pet or feed the rabbits or other wildlife.
- don't chase or handle the rabbits.
- don't abandon your pet rabbits.
