

- ▶ Provide safe and efficient movement of goods and services while striking a balance between mobility, the environment and adjacent communities;
- ▶ Provide improved mobility through Kelowna for all modes of travel including rail, pedestrians, cyclists, trucks and passenger vehicles;
- ▶ Plan for staged development of the bypass to permit future upgrades to proceed while minimizing impact on both traffic flow and throw away costs;
- ▶ Plan, design and construct the COMC in context with the Official Community Plan;
- ▶ Identify future opportunities to expand the role of the CN rail line for the movement of freight and passengers;
- ▶ Develop a multi-modal corridor taking into account provisions for future high level transit service and high occupancy vehicle lanes within the corridor.
