

Results of the Property Owner Poll – Hall Road Area

A letter was mailed to all the affected property owners, along with a polling form (see attached, page 2) intended to allow the owners to express their opinion on the project.

347 property owners were polled, and 206 owners responded. Shown below are the alternatives that were offered to the property owners as well as the numbers achieved in each category, along with the percentage of those in favour and those opposed.

- 1) Interested in proceeding with a sewer installation right away.
5 (percentage combined with option 2)
- 2). Interested in participating if the City can obtain some Provincial and/or Federal/Provincial funding.
127 (64%) in favour
- 3). Not interested in proceeding with a sewer installation project
74 (36%) opposed

There is not enough support to proceed without a government grant so this will not occur, however the majority of the respondents are in favour of applying for a grant and this will be done by the City. It may take from 6 months to several years until it is determined if a grant is awarded or not.

**HALL / PARSON ROAD – Local Area (sewer) Service
Property Owner POLL**

PLEASE RETURN THIS SECTION

Name: _____

Address (of affected
property): _____

Mailing Address (if different than
above): _____

I am interested in proceeding with the Sewer installation project **right away**, with construction taking place in 2008 & 2009 and understand that the current estimate of the cost is \$28,700 (one-time payment) or \$3,000/year for 20 years (if one-time payment is not made).

I am interested in participating in a Sewer installation project **if the City can obtain some Provincial and/or Federal funds** to reduce the costs to approximately \$10,400 (one-time payment) or \$1,200/year for 20 years (if one-time payment is not made).

I am NOT interested in proceeding with the installation of Sewer service in my neighbourhood in the near future.
