Proposed

Bellevue Creek Greenway

Bellevue Creek Greenway will provide residents with recreational opportunities in a natural setting adjacent to the creek between Okanagan Lake and Myra-Bellevue Provincial Park.

Benefits of Greenways

- ▶ Greenways protect water, air and noise quality; provide wildlife corridors; and contribute to biological diversity.
- ▶ Trails provide alternative transportation routes and encourage physical activity.
- ▶ Trails provide opportunities for stewardship and education, and access to natural areas.
- ▶ Greenways reduce the expenditures associated with flooding and other natural hazards.
- ▶ Increased tree canopy cover helps to moderate temperatures, filter out pollutants, and sequester carbon.
- ▶ Greenways and trails provide amenity value to the neighbourhood.
- ▶ Trails foster community pride, involvement and identity.
- ▶ Promote partnerships between: landowners; business'; residents' associations; and service groups.
- ▶ Trails knit neighbourhoods and existing facilities together, i.e., schools, parks, churches, commercial areas, natural areas.
- ▶ Trails provide the opportunity to understand and appreciate our heritage.

OBJECTIVES
Provide safe and healthy transportation alternatives

Link neighbourhoods, parks and public lands

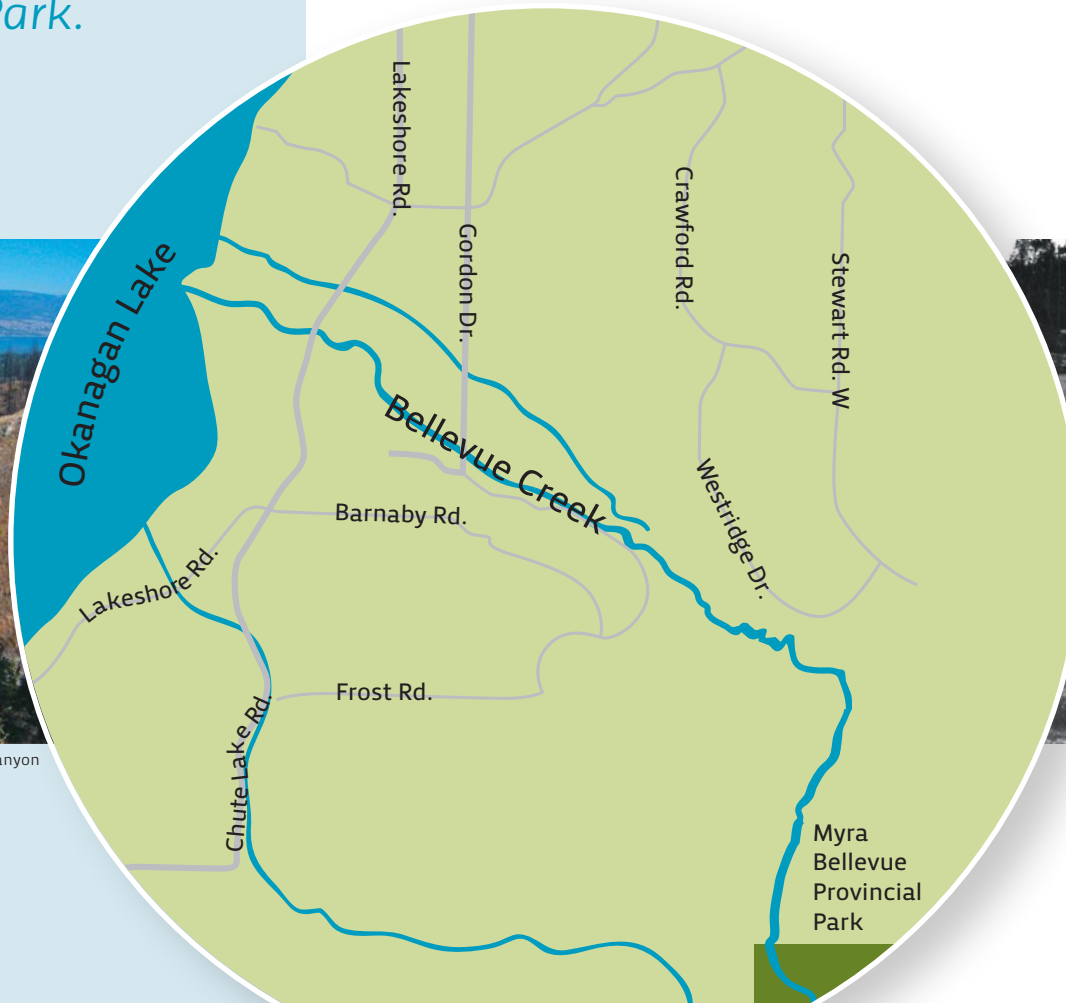

Foster environmental stewardship

Build community and enhance the quality of life through people, places, programs and partnerships

Provide recreational opportunities in balance with sensitive habitat areas

Provide opportunities to observe natural history and geology

Satisfy Kelowna residents' desires for more walking trails
