

Vanderwolf Pine

Pinus flexilis 'Vanderwolf'

Height: 20-30 feet

Spread: 10-15 feet

Sunlight: ○

Hardiness Zone: 4

Description:

The Vanderwolf Pine is densely pyramidal and has striking blue / green needles. It is a small pine making it very suitable for home gardens. It prefers well drained soil but is tolerant of poor soils and has average to minimal water needs.

Landscape Attributes:

Vanderwolf Pine is a beautiful dense pyramid with striking blue/ green needles. It is deer resistant and makes a very graceful single accent specimen for home gardens. It provides seasonal interest and habitat for birds.

Vanderwolf Pine is recommended for the following landscape applications:

- Accent
- Bird habitat

Plant Characteristics:

The Vanderwolf Pine is moderate to slow growing and has so far proven resistant to pine beetle. This tree prefers full sunlight.

This is a relatively low maintenance tree, virtually pest free. It requires little if any pruning and once established has very minimal water needs.
