Dear Property Owners:

**RE: CAWSTON AVENUE MULTI-USE CORRIDOR
DETAILED DESIGN & CONSTRUCTION**

TRUE Consulting Group has been retained by the City of Kelowna to provide the detailed design and construction management for the Cawston Avenue Multi-Use Corridor Project. This exciting project will transform Cawston Avenue into something we can all be proud of. Our work will include completion of the engineering and landscape design for the corridor, tendering the work and overseeing the construction phase.

In case you are not familiar with the project or would like more information, you can find it on the City of Kelowna's website. Go to [kelowna.ca](http://www.kelowna.ca), click on **City Projects**, then look for Cawston MUC under the **Transportation Projects** section. Alternately, you can type in the following web address: <http://www.kelowna.ca/CM/Page2183.aspx>

During construction, you can also get the latest information by going to [kelowna.ca/roadreport](http://www.kelowna.ca/roadreport) for up to date road closures, city projects and potential delays.

The current project schedule will see construction starting in late June or early July with completion in October 2010. When the design is completed you will be contacted again by mail with an invitation to an Open House meeting to review the plans. Then, about a week prior to actual work starting on each block, notices will be hand delivered to residents advising them about items such as parking, access, mail, and garbage procedures. There will also be street meeting held so residents can meet the contractor and TRUE inspector and discuss any specific issues or questions you may have.

If you have any questions at this time or would like to be placed on an email notification list to receive the latest project information as it is posted to the website, please give us a call, letter or email:
