SURVEY METHODOLOGY

300 randomly selected Kelowna residents
65% cellphones and 35% landlines
±5.7 percentage points, 19 times out of 20

Final data has been weighted to ensure that the gender/age and neighbourhood distribution reflects that of the actual population in Kelowna according to Census data.

The Citizen Survey is conducted by telephone every two years by Ipsos Public Affairs to benchmark Kelowna against other BC municipalities. A statistically significant survey methodology is used to ensure the entire community is accurately represented geographically and demographically. It is an important tool to receive citizen feedback on how effective the City's service delivery is in meeting the needs of Kelowna residents.
