

What would you like to see?

The City is interested in your thoughts and ideas about the future of the Cameron House. Before considering possible future uses, please note:

The building has a main floor and a second floor tucked beneath the roof. The building footprint is approximately 114 m² (1200 ft²).

A concept for the building suggests that the building could be added onto. The size and character of any addition would be addressed once preferred uses are determined.

The aim of any changes to the Cameron House is to not impact current functions within the park, including use by Kelowna Minor Baseball Association.

The building is not wheelchair accessible and that accessibility will be addressed as part of any future upgrades.

Additional on-site parking might be required to accommodate future uses.
