

Water Quality Advisory *in Effect*

Please be advised that consuming water from this source may pose a modest health risk.

Who should take precaution

- ▶ People with weakened immune systems or chronic illnesses
- ▶ People under 12 and over 65 years of age
- ▶ People wishing for additional protection

How to take precaution

- ▶ Boil water for one minute and allow to cool before use
- ▶ Use an alternative water resource (e.g. bottled water)

Kelowna Water Utility will advise when the Water Quality Advisory is lifted through website updates and media releases.
