

HOW TO CREATE TOURNAMENT OR LEAGUE ROSTERS FROM YOUR POOL OF PLAYERS

On the SPN website (www.slo-pitch.com) click **LOGIN TO SPN CENTRAL** (top right).

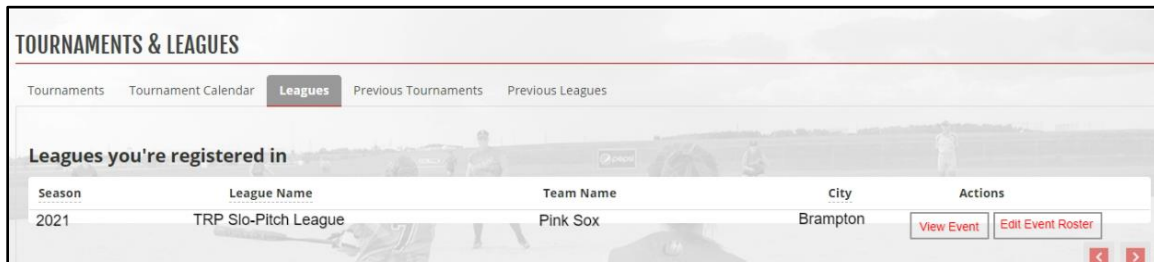

Can't Login? Have you reset your password? Do this under the Reset Password Tab.

Once you have all your core players added to your roster pool you will be able to create a tournament roster or a league roster by choosing the players from that pool.

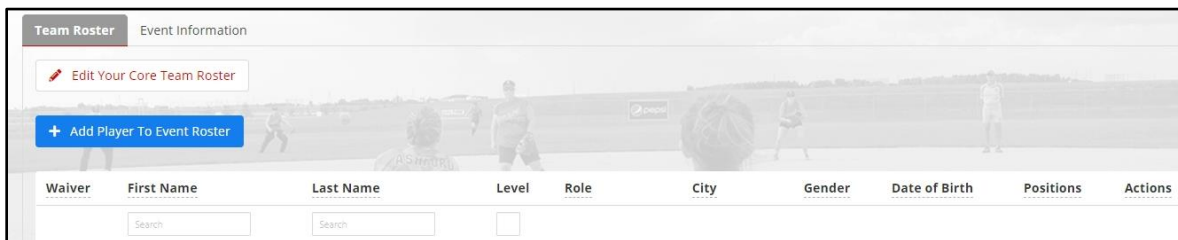

In the menu on the left under **PLAYERS AND COACHES** click on **Tournaments & Leagues**.

NOTE: The example below will be for a league roster but if you are registered in a tournament the same instructions will apply when you select the **Tournaments** tab.

Select the **Leagues** tab. Once here click the **Edit Event Roster** button. This will show you the player pool that you can select from.

You must now click on **+ Add Player To Event Roster**

A window will appear with all your players. Click the box beside each player you wish to add. After you have selected your players for your roster click on **Add Selected Players To Event Roster**

You will then see your selected players. Double check that everything is showing correctly! You have now created a League Roster that your league executive can view on their end.
